

HTH Accountants

WHAT MAKES OUR SERVICES DIFFERENT?

When your business is so much more than just the correct figures

At HTH Accountants, we invest in our clients and their businesses. We have restructured our accounting business to help our clients grow and thrive by incorporating our improved CAAS (Client Accounting and Advisory Service) model with our service packages. This is a customised advisory service that is adaptable to fit every business. We look for exciting opportunities for our clients to drive real growth and achieve meaningful results.

At a very basic level, CAAS fulfils all the bookkeeping and cash reconciliation support up to each month end close, leading to the production of annual accounts. But CAAS is a game changer for small- to mid-sized businesses because it gives you the advantage over your competitors.

The advisory team at HTH Accountants take it a step further to help you gain a deeper understanding of your business, with expert advisory support to help you make daily decisions, plan and budget for the short term and use expert analysis for insight into long-term financial planning.

What are the levels of this Client Accounting and Advisory Service Program?

The CAAS team at HTH Accountants will take on the role of Financial Controller in your company on whatever service level that suits you, and become intimately familiar with your business and the industry sector it is in. We will provide you with reliable advice and strategic insight designed to help you better understand your company's financial wellness, gain momentum, consider the big picture, providing key information at your fingertips and make successful key business decisions. *What levels of service would suit you and your company?*

1

The first step – We make an operational Assessment and take a deep dive into the people, processes and systems that make up your business, to help us understand it, and then map where you are currently and identifying the needs and pain points of your business.

2

Step two is a multiphase implementation to help you identify and then redesign your systems and processes to solve your problem areas

HTH Accountants
We start where other accountants finish

Service Levels

1. Reporting and Statements leading to Annual Submissions

'After-the-fact' cash and receipt reconciliations that we record to prepare annual accounts.

2. Business Process Outsourcing

If you are looking for someone to handle daily transactions and virtual back-office support, we have been experts for over 15 years. But we rethink the traditional back-office structure and include real time financial reporting and dashboards for you to analyse, so you can become more proactive in the market place.

3. Virtual Controllership

Financial statements, comparative reporting and budgeting, expertly calibrated to drive strategic business growth and maximize efficiency. The Aim is to provide you with timely data you can use to improve your business.

4. Virtual CFO

We work with you on your financial strategy and take on the Chief Financial Officers (CFO) role which allows you to scale and grow without significantly adding to headcount.

Are you Looking for a unique, scalable combination of professional services and technological resources expertly calibrated to drive strategic business growth and maximize efficiency? Client Accounting and Advisory Services (CAAS) with HTH Accountants might be the solution you've been searching for.

When you work with HTH Accountants, you can give your business the large-scale professional accounting expertise it needs, without the headache of dealing with recruiting, interviewing, onboarding, training and overhead costs. The team at HTH Accounting have a wealth of expert insight and ongoing professional education resources to help encourage holistic business sustainability and growth.

We specialize in helping businesses like yours do more with less.
